

Shafat Hasan

Full-Stack Developer | Software Engineer

PROFESSIONAL SUMMARY

Computer Science graduate from the University of Georgia with experience building full-stack web applications, AI-integrated systems, and frontend user interfaces using React, TypeScript, Node.js, Java, and Python. Strong foundation in software engineering, REST APIs, responsive design, Git workflows, and algorithm analysis. Interested in full-stack engineering, scalable systems, AI applications, and product-focused development.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS

Frontend: React.js, Responsive UI Design, Component-Based Architecture

Backend: Node.js, REST APIs, API Integration

Tools & Platforms: Git, GitHub, Bash, VS Code

Concepts: Object-Oriented Programming, Data Structures, Algorithms, Full-Stack Development

Experience

Zyrova Technologies

Full-Stack Developer

Atlanta, GA | May, 2025 – March, 2026

- Developed responsive full-stack web applications using React, TypeScript, Node.js, HTML, and CSS.
- Built reusable frontend components and integrated REST APIs to support scalable user experiences.
- Managed Git-based workflows, debugging, deployment support, and feature implementation across projects.
- Optimized application responsiveness and cross-platform compatibility for desktop and mobile devices.
- Collaborated on frontend architecture improvements and backend integration workflows.

Project Experience

All About You

AI and Computer Vision Application

Jan, 2025 – Feb, 2026

- Developed an AI-powered computer vision application integrating machine learning and facial recognition workflows.
- Implemented real-time face detection, feature extraction, and facial analysis pipelines using deep learning models.
- Built backend processing workflows and integrated prediction systems using Java, Node.js, and TypeScript.
- Improved model evaluation accuracy through dataset preprocessing, algorithm optimization, and performance tuning.
- Focused on scalable processing workflows, real-time analysis, and AI integration.

Skills: Java, Node.js, TypeScript, Python, Machine Learning, Computer Vision, Deep Learning, Facial Recognition, Backend Development, AI Integration

Gallery & Music App

Full-Stack Media Application

Jan, 2023 – Dec, 2023

- Developed a full-stack media application combining dynamic image gallery functionality with a browser-based music player.
- Integrated external APIs to support image search and real-time content rendering.
- Built playlist management systems, shuffle functionality, and audio playback features using the Web Audio API.
- Designed responsive user interfaces and interactive frontend components using React.
- Optimized compatibility across desktop and mobile devices.

Skills: React.js, JavaScript, TypeScript, HTML, CSS, REST APIs, Web Audio API, Frontend Development, Responsive Design, API Integration

Algorithm Performance Analyzer

Data Structures and Benchmarking Tool

Jan, 2022 – Dec, 2022

- Developed a benchmarking tool to analyze sorting algorithm performance across varying dataset sizes.
- Implemented multiple sorting algorithms and evaluated runtime efficiency, scalability, and memory

utilization using Python.

- Generated performance reports and visual summaries to compare optimization behavior between implementations.
- Applied algorithm analysis concepts to study computational performance and scalability trends.

Skills: Python, Data Structures, Algorithms, Algorithm Analysis, Performance Benchmarking, Runtime Analysis, Data Visualization

EDUCATION

University of Georgia
Bachelor of Science in Computer Science
Athens, GA | May 2026

Honors & Activities

UGA Foundation Fellowship
Dean's List, Fall 2022 and Spring 2023
Founder, Debate Club
Member, Chess Club
